EDUCATION

William & Mary, Williamsburg, Virginia

December 2025

Bachelor of Computer Science

GPA 3.61

Virginia Peninsula Community College, Williamsburg, Virginia

May 2023

Associate of Computer Science

GPA 3.96

Related Courses: Software Engineering, Software Development, Web Programming, Applied Cyber Security, Edge Computing, Software Development, Data Structures, Algorithms, Discrete Structures, Computer Organization

TECHNICAL SKILLS

Languages: C++, Python, Java, C, GDScript, Javascript

Tools/Frameworks: Github/Gitlab, Agile/Scrum, TDD, Django, node.js, React, CSS, RESTful API

Technologies: YOLOv8, SDL2/3, Godot, Unity, Unreal Engine, VMware, Firebase, SQLite

Core Areas: Software Engineering, Full-Stack Development, AI/ML, Edge Computing, Debugging, Game Development

PROJECTS

Qualtrics Analysis Tool - CSC435 Software Engineering, Django, Python, Docker, ML

Fall 2025

- Architected a Django-based web application to process Qualtrics survey data and multi-coder open coding workflow
- Implemented a semantic code search using sentence-transformers and scikit-learn to find related coding labels through cosine similarity, accelerating the reconciliation process for research teams
- Engineered a reconciliation system with automated conflict resolution, coder agreement tracking, and an interactive UI for finalizing coding discrepancies across multiple researchers

Committee Management System - Full-Stack Developer, React, Firebase, Tailwind CSS, Auth0

Fall 2025

- Built real-time committee dashboard with Firestore to enable instant message synchronization across users, featuring offline persistence and optimized read limiting to reduce database costs
- Implemented parliamentary procedure systems supporting Robert's Rules of Order, including motion tracking, voting mechanisms (anonymous and overturn), and complete audit history
- Collaborated in a 3-person team using Git for version control, pull requests for code review, and Netlify for continuous deployment with environment-specific Firebase configurations

Song Quiz - &Hacks XI Grand Prize Winner, Python, Youtube APIv3, Spotify API

Fall 2025

- Engineered interactive music quiz game integrating YouTube Data APIv3 and Spotify API with custom animation system and UI rendering in pygame
- Leveraged multithreading to handle concurrent API requests and audio processing, preventing UI freezing
- Developed in 24 hours with a 2-person team using pair programming for efficient coding, debugging, and refactoring leading to a complete project

Reminiscent Dungeon - Project Coordinator, SDL2, C++

Spring 2025

- Designed and implemented software architecture for a turn-based JRPG dungeon crawler with scalable code-base enabling simple expansion in all areas of the game
- Reached milestones with 2 working prototypes and a complete final demo including all original specifications.
- Coordinated sprint planning, task distribution, debugging, and created 4 intermediate presentations on project progress in a 4-person agile team

WORK EXPERIENCE

Tech/Sales Associate, Staples, Williamsburg, VA

June 2024 – Current

- Provide technical support for the customer's electronics, ensuring timely troubleshooting and resolution of issues
- Assist with computer hardware/software repair, setup, and configuration to optimize customers' computers

Senior Guest Advisor, GameStop, Williamsburg, VA

June 2024 – August 2024

- Led customer engagement and sales strategies, using product knowledge and experience
- Opened and closed the store, managed cash deposits, and enforced secure security practices

ACTIVITIES

Member, Google Developer Club

August 2023 - Current

- Attended monthly workshops that focus on miniature coding projects like VM's, scrappers, and small games

Member, W&M HEMA Club

August 2023 - Current

- Dedicated 4 hours a week into learning and applying historical European martial arts

Attendee, TribeHacks IX, &Hacks X, **Grand Prize Winner**, &Hacks XI
